

# MULTI-TURF Synthetic Turf

**Multi-Turf** is an attractive, natural looking protective playground surfacing solution. Multi Turf consists of UV protected polyethylene grass blades which are resistant to mother nature. Nylon fibre or rubber infill system provides a safe cushion surface for children.

**Multi-Turf** provides a natural looking surfacing solution that blends into any playspace - a great solution that allows easy accessibility and maneuverability.

# WATERPARKS Playsoft TPV

**PlaySoft TPV** is applied at a 10mm thickness. Product is anti-slip, UV stable, and self-draining. Rejuvenates existing concrete and is a cost effective alternate and affordable solution to colour concrete.

## AFFILIATIONS

Established in 2003, **URE-TECH SURFACES** is Ontario's premier installer and supplier of quality rubber surfacing solutions.

**URE-TECH SURFACES** offers a comprehensive array of surfacing products and contracting designed to be your single source safety surfacing supplier.

## URE-TECH SURFACES include:

- General contracting
- Natural playspaces and landscaping
- Concrete or asphalt pavement installation
- Retrofitting and repair of existing playground surfaces
- Fencing installation & repair

## PLAYSOFT Coloured Binder and Coloured Manufactured Rubber

**PlaySoft** "Pour-in-Place" is one of our many versatile playground safety surfacing solutions. Seamless, functional and aesthetically pleasing. Our highly trained and experienced installers can create nearly any shape, size, and coloured surface that you can dream of.

## RAINBOW TURF for Play Areas

**Rainbow Turf** Recycled Rubber adds long lasting colour to landscapes and substitutes for traditional loose-fill materials such as triple-shredded mulch, sand, gravel, and wood chips.

- Compliance & critical fall height tested to ASTM F-1292 and CSA Z614 standards
- Wheelchair accessible
- Colours: Rainbow, Jungle, Rustic
- Stretches with ground movement
- Applied to areas of any shape
- Self draining
- Soft anti-slip
- Indoors or outdoors
- Warranty and maintenance information upon request

Surfacing Solutions

## RAINBOW TURF for Landscapes

**Rainbow Turf** for landscapes utilizes recycled rubber using 100% post-consumed material derived from auto & truck tire waste. Realistic look, matching that of real mulch and making it perfect for landscaping, tree rings, flower beds, walking paths, playground surfaces, erosion control, and equestrian use.

**Rainbow Turf** is anti-fungal; averts nesting of insects; is non-absorbant, and organically dyed. Does not deteriorate, fade or float and will not splinter.

Minimal base preparation is required which makes **Rainbow Turf** the sustainable choice.

## TPV Coloured Granules

**TPV** is an alternative to the granules presently available for use in impact absorbing rubberized sports surfaces. **TPV** offers excellent thermal stability and does not leach out carbon black or coloured pigments like many of its rivals on the market. The product is UV stable, weather resistant, and will not brittle with age. Visit [www.ure-techsurfaces.com/tpv\\_granules.htm](http://www.ure-techsurfaces.com/tpv_granules.htm) for further information.
